

# DENTISTRY DEDICATED TO EXCELLENCE, WHERE BEAUTIFUL SMILES BEGIN

## BENEFITS OF DENTAL IMPLANTS

Dental implants should always be considered as an option to replace a failing or missing tooth.

Replacement of lost teeth with dental implants has been used for treating missing teeth for more than 50 years, being used to replace a single lost tooth or many missing teeth. A dental implant is a small screw made of titanium which bonds with the jaw serving as a replacement for teeth. They support crowns, bridges or dentures. Whilst the clinical benefits of dental implant treatment may be apparent, the benefits extend to practical and lifestyle improvements to the quality of your life.

- Allowing you to speak naturally & enjoy your favourite foods again, including biting and chewing
- Helps you to appear younger & healthier
- Implants fit into your jawbone & hold replacement teeth in place.
- Preserves neighbouring teeth & bone structure
- Long term data on implants suggest that implants last for a much longer time than conventional restorations on teeth

# NEW EASTBOURNE CLINIC AIMS TO TAKE THE WORRY OUT OF DENTAL TREATMENTS

**A leading Sussex dentist is celebrating the opening of his new dental clinic in central Eastbourne.**

Dr Paul Hanna, founder and principal oral surgeon at **DENTIQ** in Lushington Road, is launching a state-of-the art, purpose-built practice combining a range of services including routine dental and hygiene check-ups, pioneering cosmetic dentistry, dental implants and surgical treatments.

Dr Hanna built up a large following at his last practice in Eastbourne and, after comments and requests from patients, decided to open a new clinic that would allow him to use his expertise to help more people achieve beautiful teeth.

He explained: "I am very excited about my new practice. The aim is to give patients a five-star experience with five-star service. As well as offering stylish surroundings, we've also invested in the very latest equipment such a brand new Kodak CS9000 CT scanner which means we can place implants with millimetre precision.

"We transformed what was previously a private residence into a bespoke dental practice but tried to retain as much of the original character of the building while introducing some distinctive, modern touches. There is a welcoming reception and a separate patient lounge/waiting room which provides a comfortable, relaxed ambience."

The philosophy at **DENTIQ** is that patients should find their dentist highly approachable and personable and they should actually look forward to their visits. Careful research, honesty

and transparent pricing are also at the heart of every treatment carried out by the Dentiq team.

It's a fact that many people get anxious going to their doctor or dentist which is why Dr Hanna has sought specialist training in this area. He is currently studying for a Diploma in Conscious Sedation at the University of Newcastle and is able to offer sedation to ease nervous patients through their surgery.

One patient says he is delighted about the new clinic opening: "Dr Hanna has a very calm and reassuring manner which is so important. Having a dentist you can really trust and one who is so knowledgeable is wonderful and I know that the whole family is in safe hands." Mr D Wallace.

Another patient added: "Thank you so much for taking such a good care of my teeth. I really hope the practice goes from strength to strength and I am more than happy to say that I am one of your biggest advocates." Mr A Russell.

While cosmetic treatments such as dental implants can be life-changing for many patients, they are expensive and sometimes painful which is why choosing a highly experienced, trustworthy and qualified dental surgeon is so important.

After qualifying in 2000, Dr Hanna became interested in cosmetic dentistry and oral surgery. He has a specialist qualification in minor oral surgery and in 2012 he was recognised by the General Dental Council as a specialist in oral surgery. Dr Hanna is a member of both the American Academy of Cosmetic Dentistry and the Royal College of Surgeons in London.

**DENTIQ** is at the heart of Eastbourne at 31a Lushington Road, Eastbourne BN21 4LG.

**DENTIQ is now recruiting in the following positions:** dental nurse, dental receptionist and manager if you would like to be part of a dynamic and exiting team please forward your CV to [info@dentiq.co.uk](mailto:info@dentiq.co.uk).
